

AMENDMENTS TO THE SPECIFICATION

The first full paragraph on Page 10, is replaced with the following
rewritten paragraph:

a1 Fig. 4 is a block diagram showing a reproduction circuit of a compressed image data reproducing apparatus of the present invention. This reproduction circuit used for a non-linear editing reproduction of the compressed image data provides ~~two~~ two decoders. At the frame structure of the production circuit of the embodiment of the present invention, a variable value N, which signifies the number of frames in a GOP, is 15. And a variable value M, which signifies an interval emerging an I picture or P pictures in the GOP, is 3.
